

HELP FIX MACI'S BROKEN LEG

Maci is a 4-year old cat who broke her leg last week. She will need surgery in the amount of $6900. If she does not have the surgery, she will never be able to put weight on that leg again, and the leg will bend in different directions. She is normally a sweet, curious, and loving cat who has made an exciting world out of our apartment. She loves to sneak and pounce, but also to lay in sunspots during the day and soak up the sun. I just desperately want her to go back to being the cat she used to be, with a long, happy life ahead of her.
